

Williamsburg Montessori School
Elementary Summer Camps
2024

Explore, Experiment, Create June 17– June 28*

Alyssa Weaver

Explore the science of art in this exciting STEAM camp! Have you ever noticed that your Crayola markers bleed when exposed to water, or that oil and water don't mix? Through projects like photography, tie-dye, and paper marbling, we'll investigate the science behind these phenomena and more through colorful, hands-on experiments that will leave you with fun and creative artwork to take home!
*closed June 19th

Summer Sports July 1- July 12*

Holli Sawyer

We are going to get sporty and work up a sweat! This summer camp will be all about the campers gaining basic skills necessary with an introduction to lacrosse, baseball, soccer, basketball, and Quidditch – the game popularized by Harry Potter books. The camp will also focus on sportsmanship, teamwork, cooperation, how to practice effectively, how to be coached, and health and nutrition.
*closed July 4th

La Vida Loca

July 15- July 19

Laura Hilimire

All students will be immersed in the Spanish language; receive lessons to supplement their current Spanish study or to begin their study of Spanish and explore the culture of various Spanish-speaking countries. Activities will include visiting a Salvadoran market, Latin cuisine lessons, cooking experiences, dancing, reading, performance of short plays, comic script creation, and arts and crafts. \$60 materials fee.

Creativity at Your Fingertips – Puppetry

July 22- July 26

Okie An

Ignite your imagination and unleash your creative spirit in this puppetry-themed summer camp. Participants will craft stories, design puppets, produce a show, and deliver a performance. The puppetry experience encompasses a spectrum of skills, including creative writing, motor coordination, communication, social interaction, and self-expression.

Adventures in Architecture and Mindful Math July 29- August 2 Okie An

Embark on a hands-on and minds-on journey as campers are introduced to the world of architecture, combining both design and construction elements. Participants will explore local architectural sites and gather natural materials for their own building projects. Each morning, engaging math activities are incorporated to ward off any summer math-brain freeze.
